

You deserve better than Excel.

Meet the collaborative spreadsheet-database that minds its business.

Transform spreadsheets into secure, scalable apps.

It's familiar

With a simple, easy-to-use interface, anyone can feel comfortable in Grist right away.

It's flexible

Connect every team and unique workflow around Grist's open-source extensibility.

It's IT-approved

Self-host it, integrate with your SSO, and get enterprise capabilities that matter, like audit logs, admin controls, and best-in-class access rules.

From spreadsheet to app. No dev required.

Save time

Build out solutions in hours, not months using a system that's easy to maintain.

Save money

Cut bloated tech stacks and avoid enterprise development costs.

Save headaches

Skip the back-and-forth and spreadsheet sprawl. Operate in a single source of truth.

[Get started for free](#)

Your employees already build apps.

They call them spreadsheets, and they're getting out of control. Give them a platform that scales.

From idea to production, fast

Start with a pilot and get help migrating your existing data seamlessly into Grist.

- ✓ Start with one workflow, expand as it proves value
- ✓ If you start on our cloud, you can quickly and easily move on-prem without hassle

Work with Grist experts

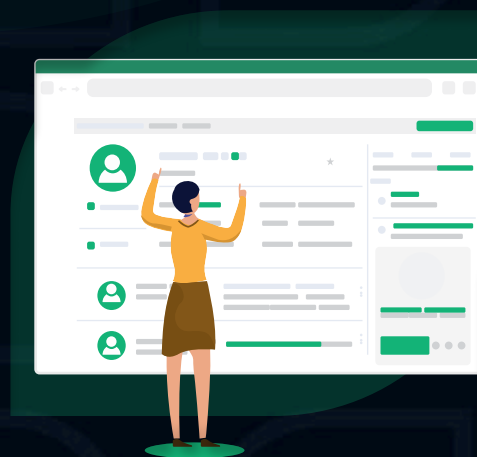

We've built Grist solutions for many teams, from simple sheets to complex multipurpose hubs.

- ✓ Migrate an existing workflow
- ✓ Create a solution from scratch
- ✓ Build custom views and integrations

Applied training workshop

We'll onboard and train your teams to be confident building their own complex workflows.

- ✓ Bring your team from basics to app-building mastery right away
- ✓ Create production-ready solutions alongside a Grist expert in a personalized building lab

Protect what matters. Scale what works.

The tools your IT team requires and the flexibility your ops teams demand, in one platform.

Host Grist on-prem for airtight control...

Deploy Grist on your own servers for complete control and compliance

Receive notice of critical updates before public announcement

Open-core model protects your investment long term

...or we manage a dedicated server for you.

No lock-in – you own the data, we handle the infrastructure

Configured to your organization's SSO, domain, and branding

Get an AWS server in a region of your choice

Your spreadsheet runs the business. Make it unstoppable.
